### Now Offering “Virtual” Eye Care Office Visits

If you are currently located in Georgia or Alabama, you can be one of the first to use our remote office visit app, EyeCare Live.

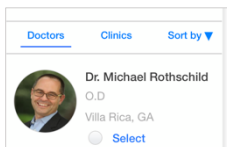

This app is suitable for many types of the most common eye conditions and you can be seen safely from the comfort of your home. The cost is \$35.00, which is less than many co-pays, and can be paid directly in the app.

There are just a few simple steps to get connected with Dr. Rothschild for a secure, effective office visit without leaving home.

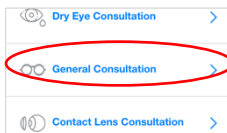

#### Download the app

Scan the QR Code to the right. Register your account and allow access to the camera or microphone.

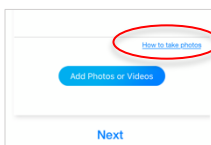

#### Find My Doctor

To choose us as your doctor, Click *Find My Doctor* and search by last name, Rothschild. Select **Dr. Michael Rothschild**.

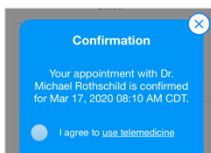

#### Select “General Consultation”

You will be prompted to enter your profile information and your credit card information.

#### Tell us what is going on

You can type your complaint or record it. We will also ask that you follow the instructions to take a good photo of your eyes.

#### Schedule Your Visit

Pick a time that is good for you and we will reach out, through the app, for your virtual visit with Dr. Rothschild.

Your doctor can see you via *EyecareLive* for non-emergency office visits like red eyes, allergies, vision changes. For eye injuries, eye pain, or vision loss see a doctor in person. For full exams, we still need to schedule an in-office exam (telehealth or in person)
